

For years, high quality vision was commonly known as laser vision correction, or LASIK. But now there's a revolutionary alternative that provides a whole new level of vision quality. It's called the Visian ICL.

See as clearly or better than you did with glasses or contact lenses

One thing you may want to know is how well you will be able to see with Visian ICL, compared to how well you could see wearing your contact lenses or glasses before the procedure.

Patients are overwhelmingly satisfied with the Visian ICL

People who have the Visian ICL continue to appreciate the results of the procedure, years after surgery. In fact, **99% of patients expressed satisfaction and have highly rated their Visian ICL experience.**

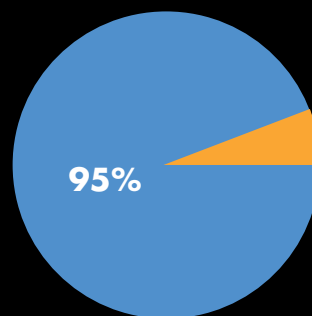

Imagine perfect vision without glasses or contacts. The Visian ICL works with the eye to correct and achieve a high level of vision like no other. Unlike traditional contact lenses, the Visian ICL lens is placed into the eye where it is designed to stay permanently; however, it can be removed or replaced if needed. What's more, Visian ICL requires no routines, no maintenance, and is unnoticeable. That means you can enjoy the benefits of corrected vision without compromise.

Learn more about the fast and lasting results that people just like you have experienced with the Visian ICL.

95% of Visian ICL patients can see as well as or better than they did using corrective lenses before surgery¹

Percentage of patients who could see just as well or better

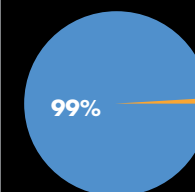

Same or Better Vision Than Glasses or Contact Lenses

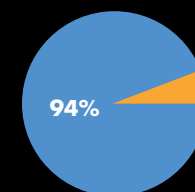

- Of 3,500 patients surveyed, a vast majority had vision that was the same or better with the Visian ICL when compared to corrective lenses¹
- What's more, over 40% of patients could see *better* with the Visian ICL than with their corrective lenses¹

Patients agree: the Visian ICL was the right choice²

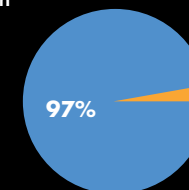

After 3 years, patients rate their experiences as very positive²

Patient Satisfaction

Quality of Vision

Have Surgery Again

When asked about the performance and results with the Visian ICL:²

- **99% expressed satisfaction** with their Visian ICL
- **97% said they would be willing to have the surgery again**
- 94% were pleased with their quality of vision

Quick vision improvement and lasting correction without glasses or contact lenses

Visian ICL patients are "Wowed" by the immediate improvement in their vision. Most have said that they can see many times better with Visian ICL than with ANY other vision correction solution they've tried.

Just one day after surgery

- 90% of patients could see "driving vision" 20/40 or better¹
- More than half of all patients had "ideal" 20/20 or better vision¹

"After just 10 minutes, I was up and could see 20/20. Now it's a year later, I'm a World Champion, and I still think the results are pretty incredible."

-Steve Holcomb, USA Olympic Bobsled Gold Medalist

"Right after I got the lens, I could see better than with my contact lenses. 48 hours after the surgery I was already seeing 20/15, 20/10 and I didn't expect to even see 20/20."

-Tom Danielson, USA Champion Professional Cyclist
